

Language and Cognition in Argumentation (LANCAR)

RESEARCH FAIR 2021 PRESENTATIONS - Monique Flecken, Federico Gobbo, José Plug, Jean Wagemans

Aims and scope of the research group

The central aim of the researchers involved in the LANCAR group is to complement existing approaches to argumentation with linguistically advanced models of argument processing, assessment, and production. They do so for scientific reasons, to gain a better theoretical understanding of argumentation as the expression of reasoning in language, but also for societal reasons, to contribute to the improvement of people's critical thinking and argument-checking abilities as well as the further development of argumentation technology.

Research Fair Programme

15.00 – 15.30	Adpositional Argumentation
15.30 – 16.00	Philosophy of Argument
16.00 – 16.30	Psycho-Argumentation
16.30 – 17.00	Argument-Checking

*Language
and
Cognition
in
Argumentation*

Group coordinator

Jean Wagemans – j.h.m.wagemans@uva.nl
